

Training Electrical Safety

Safety Is Our Only Focus®

Training Electrical Safety

As a Test & Measurement provider, we aim to not only deliver instruments but deliver the complete solution, including the service, support and training. Regulations require that Electrical Safety Test equipment are operated by sufficiently educated persons.

Our training is focused on providing the operators the right basic knowledge about electric circuits, dangers involved with high voltage and how the instruments are operated safely.

General information:

- Duration : 3 hours standard, different duration possible
- Attendees : up to 10

Topics covered:

- Basics of a safe workspace
- How to use safety test equipment
- Introduction to the several electrical safety tests
- Hands-on (using customer equipment)
- Local/remote programming

Included material:

- Training slides
- Certificate for each attendee

Price is calculated based on our hourly service rate and standard travel costs.

If your interested please don't hesitate to contact AR Benelux B.V. for discussing your specific needs.
